

SLICK1-V4
SPEAKER

The SLICK1-V4 Tweeter has high density heat pressed foam sorround to give an accurate bass response and the high motor force gives huge economic gains. the tweeter also features a lightweight paper cone which allows the driver to be highly efficient and it produces a full sound. Moreover, the permanant speaker set up allows for a superior power and it means the tweeter can be placed higher up in the vehicle this then means that it offers better sound quality. The high efficiency component speaker set ensures that every user gets the most out of the speaker. The traditional VIBE aesthetics integrates a removable steel mesh grille featuring red and black for great integration with all slick products. The conservative RMS rating allows the slick series to be used in most vehicles even with factory head units, even greater output can be achieved when paired with one of our Powerbox amps for example the POWERBOX65.4M-V7.

Model	SLICK1-V4
Type	Tweeter
Speaker size	2" (50mm)
Peak/RMS Power	150W/50W
Sensitivity	94dB
Freq.Response	1.5Hz-25kHz
Impedance	4 Ohms
Grille Included	Yes

HIGH DENSITY - The Tweeter features high density heat pressed foam surrounding the bass to create an accurate bass response.

LIGHTWEIGHT PAPER CONE - The Tweeter also has a light weight paper cone which allows the driver to be highly efficient and the higher efficiency produces a full sound.

COMPONENT SPEAKER SET UP - the component speaker set up creates a superior sound and it allows the tweeters to be placed higher up in the vehicle which offers better sound quality.

FINITE ELEMENT METHOD MAGNETICS - The higher motor force gives huge power gains overall.

FEMM MOTOR

The femm motor produces high motor force and produces high power gains.

COMPONENT

The speaker has a component feature meaning that the speakers can be placed higher up in the vehicle offering better sound quality.

FOAM

High density heat pressure foam provides an accurate bass response.

PAPER COMPOSITE

The tweeter has a lightweight paper cone which allows the driver to be highly efficient, this produces a fuller sound.

CO-AXIAL

The co-axial speaker with mid and tweeter paired in one single unit, with on board filters included.

SPADE TERMINAL

To allow fast and secure connections to the speaker there is a spade terminal.
